Klaus

Klaus-C-T-P
Carnitin+Taurin
Power

PL Zalecane podawanie: W czasie lotów w połączeniu z Silberfeil-Methode, w piątek 2-6ml, a w czasie roku sroda i piątek 2-6 ml na 1 litr wody lub do karmy, na 20 gołębi. W czasie wyjątkowego stresu 6-10 ml na 1 litr wody 2 razy w tyg. Resztę czasu 6-10 ml na 1 litr wody 1 raz w tyg. Butelkę przechowywać zamkniętą, w ciemnym i chłodnym miejscu.

NL Gebruiksaanwijzing: Tijdens de vluchten 10 ml woensdags en vrijdags 20 ml in 1 liter water of over het voer voor 20 duiven. In bijzondere stress-situaties 10 ml in 1 liter water 2x p/week. Het overige seizoen 10 ml in 1 liter water p/week. Flesje gesloten houden en koel en donker bewaren.

GB Carnitin-Power-Komplex should be administered on Wednesday 10ml and on Friday 20ml either in the drinking water or mixed with the feed (approx 20 pigeons). In stress situations Carnitin-Power-Komplex should be used twice a week, 6-10 ml to 1 litre water. During all other times use once a week 6-10 ml to 1 litre of water. Store bottle in a cool, dark place.

D Fütterungsempfehlung: Während der Reise am Donnerstag 10 ml u. am Freitag 20 ml pro 1 L Trinkwasser od. über das Futter für 20 Tauben. In allen anderen Zeiten 10 ml pro L Wasser 1x wöchentlich. Flasche geschlossen, kühl und dunkel aufbewahren.

*Products for pigeons
and other domestic animals*

important information for pigeon breeders

Klaus Gritstein announce the amazing results following a recent trial of their product Picorin at the Zorn breeding stud.

Pigeon using Picorin

day	Loft 1	Loft 2
1	21	21
2	34	34
3	45	45
4	63	63
5	81	80
6	108	107
7	133	130
8	165	162
9	190	185
10	213	208
11	230	211
12	252	244
13	268	256
14	288	272
15	314	290
16	333	309
17	343	321
18	362	332
19	370	342
20	377	351
21	381	351

A significant improvement in growth can be seen in youngsters. After only 22 days their growth is so advanced that they can be weaned from their parents. At 2 months old the youngsters have the growth and physique of adult pigeons.

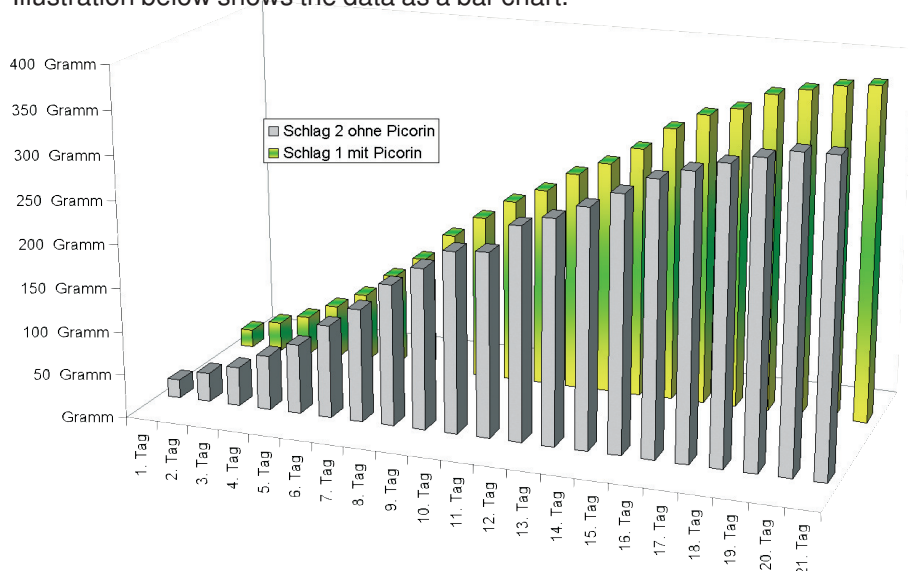

To see whether Klaus **Picorin** delivers what it promises the following trials were carried out in 2 different breeding lofts using 12 pairs of pigeons in each. In the first loft (Loft 1) the breeding pairs were given **Picorin** daily. In the second loft (Loft 2) the pigeons were given no **Picorin** but all the usual mineral supplements.

The youngsters were weighed electronically every day and their weights listed on a table (see Tab 1).

The listed weights in the table are based on average values of youngsters.

Tab. 1: Average weights of the youngsters on loft 1 (given Picorin) and loft 2 (not given Picorin)

Illustration below shows the data as a bar chart.

Illus. 1: Bar chart showing Loft 1 youngsters fed Picorin Loft 2 youngsters without Picorin

Results:

Loft 1

A significant 8% increase in growth. The youngsters are also much more uniform in weight indicating improved food utilisation and better all round general health. Their plumage is excellently formed.

Loft 2:

Although the youngsters in this loft have been provided with good breeding and mineral supplements there are significant differences in their development compared with Loft 1. The proportions of weight are much less uniform within the entire group.

To ensure that the findings from this trial were not just random we repeated the test for a second time reversing the situation so that the opposite lofts were given Picorin. The results were confirmed.

Both breeding lofts show the weights as practically identical until 4 days old. At 5 days old the weights begin to show a significant change with Loft 1 youngsters beginning to show increased growth on Loft 2 youngsters. At 3 weeks old the Loft 1 youngsters show a staggering 8.2% growth increase on Loft 2 (illus. 1)

see Picorin: page 7

Mineral nutrition

Klaus Gritstone is a vital nutritional supplement for pigeons and fowls. A balanced supply of minerals is indispensable for health and vitality. Perfected in years of thorough research and years of practical use.

Art.-Nr. 1001 1 pc.

Klaus Nährgritstein® - Extra Nutrient Gritstone - Extra
Our high-quality gritstone for widowers and volary birds. Nutrient Gritstone - Extra contains vital trace elements concentrated with the requirements of these animals in mind.

Art.-Nr. 1003 1 pc.

Siegertauben® Taubenbrot

Pigeon bread is a mineral nutrient that is comparable to the Klaus-Gritstone. Its structure is little more coarse, contains less phosphorus, is some cheaper and is only available in a 6-pack

Art.-Nr. 1762 6 pcs.

Klaus PicMix - Mineral
Original Klaus pickstone formula in ideal grain-size for pigeons in thrifty 5 kg pail.

We recommend it - pigeons prefer it.

Art.-Nr. 1041 5 kg

Picobal® Briefftauben-Mineral - Pigeon mineral

is made from selected raw materials.
- it supports a better building up of feathers and bones
- prevents against deficiency symptoms and the resulting diseases
- is good for the growth of bones and feathers for young pigeons
- is necessary for the mineral supply during the whole year

Feeding advice: Picobal pigeon mineral will be given to the pigeon in dry condition into a separate pot or feeder. It should be available all year round.

Art.-Nr. 2008 5 kg

Klaus Grit with anise
A favourite standard mixture of low-dust, first-class Danish and Dutch oyster and mussel shells. Should be made available to pigeons the year round. Ensures improved calcium supply and feed utilisation.

Grit with anise

Art.-Nr. 1006 2,5 kg

Art.-Nr. 1016 5 kg

Art.-Nr. 1017 25 kg

Pico-Grit® -

The grit mixture for serious breeders. Pico grit is the ideal combination of the cleanest Belgian, Dutch and Danish grits and coral algae. Unparalleled combination.

Art.-Nr. 1005 2,5 kg

Art.-Nr. 1015 5,0 kg

Art.-Nr. 1012 25 kg

Faunavit® - B

This vitamin and trace element mineral substance mixture for carrier pigeons has a versatile formula and is highly effective. Faunavit B is readily absorbed, prevents deficiency symptoms, increases performance levels and strengthens resistance to disease. It binds liquid vitamins added to feed as well as Maratonin oils.

Art.-Nr. 2090 1 kg

Art.-Nr. 2093 5 kg

- vitamin A,
- vitamin D3,
- vitamin E,
- vitamin B1,
- vitamin B2,
- vitamin B6,

- vitamin B12,
- vitamin K3

proteins, elektrolytes, performance enhancer

Siegetauben® Superkraft-GeNies

super power GeNies powder

The building-up preparation GeNies powder contains all important essential amino acids. It leads to an upgrading of the corn fodder and to an improvement in the fodder utilization due to the addition of metabolic, active substances, vitamins and trace elements. GeNies powder furthers the development and growth of young pigeons and should therefore be given regularly to breeding and young pigeons. It can be administered via both the fodder and the drinking water.

Art.-Nr. 2709 - 400 g

Art.-Nr. 2712 - 2000 g

Siegetauben® Superkraft-Amino E, B₁₂ + C

super power amino E, B₁₂ + C

is a building-up and conditioning preparation. It is used for rapidly revitalizing travelling pigeons and improving their condition.

It has a stimulating effect on the breeding pigeons in the preparation phase before breeding.

It can be administered via both the fodder and the drinking water.

Art.-Nr. 2710 - 200 g

Siegetauben® Superkraft Elektrolyt - P

super power electrolyte P

This powdered electrolyte preparation is used for carrier pigeons before and after their flights, particularly in the case of hot weather and difficult flights. For feeding and breeding pigeons and growing youngsters, the addition of electrolyte P is a sure way of meeting the pigeon's increased requirement of mineral substances and trace elements.

Art.-Nr. 2711 - 400 g

Silberpfeil® - Reise 1

(Silver Arrow Racing 1)

Racing 1 is a water-soluble, high-quality PROTEIN CONCENTRATE to improve protein supply following races. Short-chain proteins, i.e. activated animal proteins in easily digestible form make up 55% of this preparation. Methionine, mineral substances, trace elements and vitamins support protein metabolism and are therefore further indispensable contents of the product.

Art.-Nr. 2175 - 100 g

Silberpfeil® - Reise 2

(Silver Arrow Racing 2)

For combination with Racing 1.

This preparation is fed to the birds on Wednesdays and Thursdays. Racing 2 contains water-soluble animal proteins as well as the vital amino-acids lysine and methionine. The minerals potassium and phosphorus, essential for musculature and iodine to activate the thyroid gland, as well as B vitamins for metabolism are also contained in Racing 2. Racing 1 and Racing 2 together make up a racing regimen.

Art.-Nr. 2176 - 100 g

Silberpfeil® - Reise 1 - capsule

(Silver Arrow Racing 1) - capsules

These capsules contain the valuable contents of Silver Arrow Racing 1 powder and are administered individually to late-returning pigeons in gelatin capsule form. They support rapid regeneration. Racing 1 capsules stimulate growth in valuable squabs. Easy-to-handle blister package, can be stored for longer periods. These „BROWN SUPER PILLS“ are a tip shared by successful breeders.

Art. nr. 2177 - 45 pcs

Siegetauben® JET2000/20

Jet2000/20 is a soluble water liquid to be offered in the drinker. Recommendation: improvement of metabolism and racing-condition of the pigeon, disinfection of drinking water.

Dosage: Racing-season daily (Except day of basketing) 1-2 ml per litre water.

Dosage: Breeding-season; Youngbirds and Oldbirds twice a week 1 ml per litre water.

Art.-Nr. 2756 - 300 ml

Jodoferrol Iodine + ferrum preparation

with the iodine-factor 20 for racing pigeons

Jodoferrol is named for the additional nutrition with trace-elements, especially with iodine and iron.

They are essential for the metabolism, and necessary for enhancing the oxygen intake which is needed to strengthen the power output.

After the flight they are responsible for a fast regeneration of the pigeons and they prevent dehydration and a loss of trace elements.

Art.-Nr.: 2283 - 500 ml

Maratonin® - Energie-Kapsel

energy capsules

This unique new development contain high-energy peanut oil along with the anti-stress mineral magnesium. Only the most valuable energy source in the peanut is used to make these capsules - peanut kernel oil. The protein is not readily digestible and is removed so as not to burden the pigeons' metabolism unnecessarily.

Art.-Nr. 2112 - 250 pcs

Silberpfeil® - Zuchttabletten

(Silver Arrow breeding tablets)

Ideal building up preparation with valuable, easily digestible protein, amino-acids, mineral substances, trace elements and vitamins; everything squabs need for perfect growth. Vitality and fertility are retained in older breeding pigeons with Silver Arrow breeding capsules.

Art.-Nr. 2180 - 350 pcs.

Klaus - PIXO® tablets

using the repair formula

- rebuilding, stabilizing, new building - for use in pigeons with overloaded muscles, joints, tendons (for example for pigeons after hard races or in the beginning of the training after the winter-time)

Klaus - PIXO with the extract from the New Zealand greenlipped mussel

Art.-Nr. 2191 - 100 St.

Art.-Nr. 2192 - 350 St.

Tricom® electrolyte, liquid

with oligosaccharides is a solution of vital mineral salts and trace elements as well as high-energy polysaccharides. It is formulated in accordance with scientific principles and purposely kept „low in chlorides“. The balanced, multiple-use formula replenishes electrolytes lost during strenuous flights or illness and balances the electrolytes in pigeons' bodily fluids.

Art. nr. 2170 - 250 ml

Art. nr. 2171 - 500 ml

vitamines, elektrolytes, moulting aid

Vitamultin® MB

multivitamins, liquid

is suitable not only for optimum breeding and racing, but also for constant moderate use throughout the year. Vitamultin MB is an all-round product not only for specific use before and after strenuous flights, but prior to exhibitions and during moulting as well.

Art.-Nr. 2181 500 ml

Vitamultin® B-Komplex, liquid

This water-soluble vitamin preparation contain 7 B-complex vitamins. Its broad range of uses shows how varied the physiological effects of this modern preparation are. Examples: enhancement of metabolism, protection of gastrointestinal tract (paramyxovirus infections), maintenance of optimum function of nerve tissue, mucous membranes, heart and digestive organs. Vitamultin - B supports formation of red blood corpuscles and antibodies to pathogens.

Art.-Nr. 2166 300 ml

Vitamultin® - E,

Vitamin E is the fertility vitamin for breeding and racing pigeons, before mating and during breeding. It regulates the development and function of the reproductive glands and prevents deficiencies in fertility, hatching and embryo survival caused by vitamin E deficiency.

Art.-Nr. 2167 300 ml

Siegertauben® Vitamina®

This multivitamin preparation contains 18 vital vitamins in a golden yellow, clear solution. The many-sidedness of this water-soluble vitamin concentrate makes it a logical choice during all periods involving stress. Nerve function and circulation are enhanced, metabolism and resistance strengthened. All types of vitamin deficiency are prevented.

Art.-Nr. 2770 100 ml Art.-Nr. 2771 250 ml
Art.-Nr. 2772 500 ml Art.-Nr. 2773 1000 ml

Vitamultin® multivitamin tablets

are suitable not only for optimum breeding and racing, but also for constant moderate use throughout the year. Vitamultin multivitamin tablets are an all-round product not only for specific use before and after long flights, but prior to exhibitions and during moulting as well.

Vitamultin multivitamins tablets - and your pigeons are in top form.

Art.-Nr. 2161 100 pcs

Vitamultin® B-complex tablets

contain B1, B2, B6, B12, calcium pantothenate, folic acid, niacinamide and biotin. These B-complex vitamins are „high-performance“ vitamins. The vitamin B-complex tablets are particularly well-suited for individual treatment of racing pigeons and growing squabs. Their range of effects is identical to that of the liquid vitamin B complex liquids.

Art.-Nr. 2160 100 pcs

Vitamultin® - E tablets

for assisting the metabolism and fertility of carrier pigeons.

Racing pigeons are given 1 tablet per day after their return.

Breeding pigeons are given 1 capsule 2-3 times a week, 14 days before mating, up to the time of separating.

Art.-Nr. 2107 150 pcs.

Klaus Vitamin-cushins A-D3-E

for short-period vitamin supplementation, water-soluble. Administer in drinking water or feed.

Art.-Nr. 2938 1 x 20 ml
Art.-Nr. 2939 12 x 20 ml

Klaus Vitamin A-D3-E (bottled)

Art.-Nr. 2934 100 ml
Art.-Nr. 2936 500 ml

Tricom® Mauserhilfe moulting aid liquid

This water-soluble preparation with essential amino acids is a help throughout the moulting period. It contains important substances required by pigeons to form feathers. The decisive advantage of Tricom moulting aid is its high content level of the sulphurous amino-acid methionine in combination with valuable mineral salts and a special multivitamin concentrate.

Art.-Nr. 2274 2500 ml
Art.-Nr. 2273 1000 ml

Siegertauben® Bio-Power

is a biological building-up preparation to increase the condition and performance. It helps to strengthen the resistance against diseases. It contains valuable herbs, lecithin, special soil, trace elements and amino acids.

Feeding advice: For breeding and young pigeons, 2-3 times a week one heaped table spoon per kg food. Racing pigeons need it during the first half week after the race 1 or 2 times one tablespoon per kg of feed.

Art.-Nr. 2113 400 g

Columbalyl - Calcium-Drink (liquide)

is a liquide supplementary feed to prevent feed implemented deficiency of calcium. Calcium supports the feather growth. Calcium to build up bones. Calcium prevents feather picking. Calcium is important for the signal submission between nerves and brain.

Art.-Nr. 2105 500 ml

Siegertauben® Vita-Blut-Extra®

Vitablood - extra - This valuable tablets with animal protein ensures top condition.

Vitablood - extra is an aid for raising and strengthening squabs as well as improving condition and raising performance levels in breeding and racing pigeons. Is also as a restorative blood tonic.

Art.-Nr. 2701 350 tablets
Art.-Nr. 2702 700 tablets
Art.-Nr. 2703 1200 tablets

natural Maratonin® substances

Maratonin® tea

is a selection of 16 different medicinal herbs with blood-cleaning and detoxifying effects. It enhances the pigeons' general well-being, strengthens their natural defenses and shortens the recovery period required after a flight. It leads to more rapid normalisation of digestion and thus facilitates the buildup of new energy reserves.

Art.-Nr. 4153 200 g

Maratonin® garlic oil

This natural extract of the garlic clove binds well with grain feed due to its oily nature.

Advantage of Maratonin garlic oil: Even, more rapid active agent uptake so that the positive, health-inducing properties of the garlic are more effective.

Art.-Nr. 2145 250 ml

Maratonin® Lecithin-Pulver

Lecithin lecithin powder

- improves fat resorption and fat utilization
- stabilizes the metabolism
- increases pigeons' functional capacity and joy of flying
- improves the development of pigeons' growth
- strengthens the entire organism
- contributes to forming a smooth, shiny and water-repellent plumage.

Art.-Nr. 2152 400 g

Maratonin® combi-power-oil

consists of different valuable vegetable oils.

Those oils contain high percentages of vital unsaturated fatty acids.

This is an excellent power source for the whole year.

Art.-Nr. 2142 500 ml

Maratonin® brewer's yeast (fine)

100% pure brewer's yeast - best quality. The enormous physiological value of this product arises from a number of properties that influence the metabolism in a positive manner. Maratonin brewer's yeast, administered regularly in feed, makes for vital pigeons with a pronounced resistance to infection.

Art.-Nr. 2151 500 g

Maratonin® soy-energie-oil

This healthy plant oil contains a very high amount of natural vitamin E and also high quantities of linolenic acid which enhances the fat resorption.

Art.-Nr. 2143 - 500 ml

Maratonin® brewer's yeast (coarse)

It contains numerous natural components that enhance the metabolism, performance and health such as essential amino-acids, B vitamins, trace elements and substances that enhance growth. A particularly gentle drying method ensures that these active ingredients are preserved in their entirety in our Maratonin brewer's yeast.

Art.-Nr. 2150 600 g

Art.-Nr. 2933 3000 g

Maratonin® soy-origanum-oil

is a vitamin E rich plant oil combined with the antibacterial, aromatic substances of the Origanum. Soy-origanum oil can be used to store energy reserves for a coming flight. The main ingredients of the origanum, the thymol and the carvacrol, enhance the feed intake and have antibacterial properties.

Art.-Nr. 2133 500 ml

Klaus Origa Plusnea

In **Origa Plusnea** are the good properties of origanum and usnea barbata combined. The active plant ingredients of both components build a synergetic wall against pathogenic germs. The bitter agents of the usnea barbata and the main ingredients of the origanum (carvacrol, thymol) have besides the appetising and aromatic effects - antibacterial and fungicidal properties.

Art.-Nr. 4255 300 ml

Maratonin® wheat germ oil

is to be recommended especially during mating and racing, administered in feed.

It contains the natural vitamins E and F as well as provitamin A.

The unsaturated fatty acids and vitamins in this preparation have a high biological value. Maratonin wheat germ oil supports fertilisation.

Art.-Nr. 2154 250 ml

Klaus Usnea barbata

Usninacid has antibiotic properties on pathogenic germs and has a function as an Appetite stimulant! Klaus Usnea Barbata, liquide solution for carrier pigeon to prevent respiratory problems, coccidiosis and canker infections.

To cure for breeding and racing preparation.

Dosage:

5 ml Klaus Usnea barbata per 1l of water.

Art.-Nr. 4252 500 ml

Maratonin® cod-liver oil

Maratonin cod-liver oil is a cold-filtered, natural liver oil equivalent to medical quality cod-liver oil. Special treatment makes our cod-liver oil stable for long-term storage. Liver oil is used especially during the rearing of young.

Art.-Nr. 2157 250 ml

Art.-Nr. 2158 500 ml

Art.-Nr. 2159 1000 ml

Art.-Nr. 2932 5 litre

300 ml

500 ml

Energizer and care Trevit®

Trevit is a ready-to use restoring and performance supplement consisting of natural ingredients; free from artificial vitamins, preservatives and colouring. It is pure nature. Also the small concentration of mineral salts is not added artificially. The powder-form simplifies the making of a Trevit-drink.

1 heaped teaspoon to 1 litre of water makes 1 litre of Trevit-drink.

Racing time: To increase and maintain the highest possible performance Trevit should be given 2 or 3 days daily (this depends on whether the race is hard) before putting them into the basket. On the day of basketing only clean water is given. After the race, Trevit should be added to the drinking water for 2 days to overcome race exhaustion more rapidly.

Moulting time: For perfect moulting and the renewal of healthy feathers. Trevit helps the pigeons to overcome the extra strain during the moulting period. From the beginning of September until the loss of the last tail-feather Trevit in the drinking water should be given regularly every third day.

Winter time: During the gloomy winter months it is advisable to give the pigeons Trevit every Saturday, to increase their resistance and to maintain their vitality.

Breeding time: Trevit is given every second day from 14 days before pairing until the pigeons are separated. After that the treatment should be discontinued. For successful development of the young birds it is advisable to give Trevit every Saturday for the first 8 weeks. **Art. nr 2240 250 g**

Trevit® Forte Energeticum

is a combination of effective energy sources from the nutrient group of carbohydrates. This product combines valuable sugar compounds (mono-saccharides, disaccharides and oligo-saccharides) and the most important components of natural honey. Administered after a flight, this preparation balances out the energy household of pigeons. Trevit Forte is administered in drinking water.

Art. nr. 2241 250 g

Art. nr 2940	200 g
Art. nr 2944	400 g
Art. nr 2941	600 g
Art. nr 2942	3000 g

Pelin® essenc

For strengthening and stimulation of the metabolism. , Aromatic mix with herb extract.

Composition: extract of plant by-products (rosemary, chamomile, anise, fennel, eucalyptus, menthol, camphor).

Dosage:

5 ml = 1 teaspoon for 1 l drinkingwater

Art.-Nr. 9245 30 ml

Art.-Nr. 9246 100 ml

Art.-Nr. 9251 250 ml

Pelin Re® 6

is the proven preparation for optimal feed intake (apapite stimulation) and better feed digestion. It has to be given in intervals of 5 days with the drinking water.

Dosage:

10 ml = 2 teaspoons for 1 l drinkingwater before shows it can be doubled

Art.-Nr. 9247 50 ml

Art.-Nr. 9248 100 ml

Art.-Nr. 9252 250 ml

Combi-Trimonex® tablets

This combination preparation with three highly effective, readily tolerated substances is effective against trichomoniasis (canker), coccidiosis and crop membrane inflammations. The tablets are used for individual treatment of diseased pigeons and specific prophylaxis in racing pigeons and squabs. Racing pigeons receive 1 Trimonex after the race in the evenings on every 2nd or 3rd weekend.

Product is only available in Germany

Supplementary food Picorin®

Picorin is a supplementary food and supports the food optimization.

We expect from Picorin, that a better natural immune strength will be trained, that a more even growth takes place and that the genetic growth-potential can be reached if the other food has a balanced quality and that young pigeons which grew up with Picorin, as well as adult pigeons, will have clear advantages against other pigeons.

Composition: Yeasts, algae, minerals, vegetable by-products, Lysine, Methionine, milk and dairy products, Tryptophane

Picorin is made of high-quality raw materials which contain a very large number of native trace elements, natural active substances and amino acids.

Depending on the quality of the basic food used and the demand of the animals, Picorin can be used from 0.5% to 2%, maximally 4%, of the daily feed rations. A visible change can be expected by feeding 0.5%. It is recommended that the minimum 0,5% is fed permanently.

Particularly during the moult, breeding, raising youngsters and in times of special demand it makes sense to feed up to 2% of the grain food.

Feeding advice: Picorin is administered as powder over the food. To ensure that Picorin mixes with the feed, moisten with water or Combi-oil. Mix the feed well and ensure the feeding tray is clean. The prepared feed should be consumed on the same day

Siegertauben® WU-PU

is a combination of finely ground herbs that expel or ward off worm invasion. It is bound to feed by means of Maratonin garlic oil and used as a cure prior to commencement of breeding, racing and moulting. Besides warding off intestinal parasites, the product calms intestinal activity, support down moulting and enhances formation of well-formed, solid droppings.

Art.-Nr. 4765 200 g

Siegertauben® colds tea

prevents mucous membrane ailments in the upper respiratory tract, especially in sickly squabs. This select tea mixture of herbs with antibacterial and mucosa-protective qualities is formulated in accordance with the latest homeopathic pharmacological research.

Art.-Nr. 4775 150 g

Siegertauben® Diarrhoea Pills

Stop diarrhoea by calming the intestine, in particular the intestinal mucous membrane. Droppings solidify and the destroyed membrane can be restored.

Art.-Nr. 4730 100 pills

Klaus

- method

Sunday

after return: Maratonin-Bloodpurifying Tea with Trevit or Trevit Forte. **Food:** 50% Depurative-Mix, 50% barley. **Important :** For individual treatment of late-arrivals, please use Silberpfeil-Reise 1-Capsules:

Monday:

morning:

Silberpfeil-Reise 1: one measuring spoon (5g) per 1l water or over the food for ca. 25 pigeons. (use preferably lemon-juice).

evening:

Silberpfeil-Reise 1: one measuring spoon (5g) as used in the morning, but freshly prepared! **Food:** as in the morning.

Tuesday:

morning:

clean water

Food: 50% barley, 25% Depurative, 25% Racing-Mix

evening:

clean water or **Maratonin Garlic-juice,**

Food: 25% barley, 25% Racing-Mix, 50% Depurative.

Wednesday: morning:

Silberpfeil-Reise 2: one measuring spoon (5g) per 1l water or over the food for ca. 25 pigeons.

evening:

Food: 25% barley, 25% depurative, 50% Racing-Mix

Silberpfeil-Reise 2: one measuring spoon (5g) as used before, **but freshly prepared.**

Thursday:

morning:

clean water

Food: 50% Depurative, 50% Racing-Mix,

evening:

clean water

Food: 25% Depurative, 75% Racing-Mix,

Friday:

morning:

clean water **Food:** Racing-Mix

evening:

Vitamultin-B-Komplex 1-3ml per l of drinking-water (depending on the distance)

Food: Racing-Mix (as much as the pigeons want to eat)

If the distance is longer than 300 km add Maize to the food
prefer Maratonin Energie capsules

Saturday:

morning:

clean water

Food: 25% Depurative, 75% Racing-Mix.

noon:

clean water

Food: Rice

Siegertauben[®] **Superkraft - method**

Amino, E, B₁₂ + C - GeNies-powder - Elektrolyt P

	Sunday: after return: In the drinker: Maratonin Bloodpurifying Tea with Trevit (5-10g/l). In hot weather add Superkraft Elektrolyt-P . Food: a small amount of Depurative-Mix. evening: Superkraft Amino,E,B12+C , into the drinker, between 3-5g per l water, depending on the difficulty of the race. Food: Depurative as required, after a difficult race 50% racing-Mix	 
	Monday: morning: 1/3 Depurative-Mix, 1/3 barley, 1/3 Paddy-Rice; clean water. evening: 1/3 Depurative-Mix, 1/3 barley, 1/3 paddy-Rice. After a trying race once more Superkraft Amino,E,B12+C (3g/l), otherwise clean water as usually.	
	Tuesday: morning: 40% Depurative, 20% barley, 20% Paddy-Rice, 20% Racing-Mix, clean water. evening: 40% racing-Mix, 30% Depurative, 15% barley, 15% Paddy-Rice; add to the Food Maratonin Garlicoil and dry it with Maratonin Brewersyeast. Pelin Essenz (3ml/l) into the drinker.	 
	Wednesday: morning: 60% Racing-Mix, 10% Depurative, 10% barley, 10% Paddy-Rice, 10% Sunflower (striped); clean water. evening: The same as in the morning.	
	Thursday: morning: 70% Racing-Mix, 10% Depurative, 10% Paddy-Rice, 10% Sunflower (striped), clean water evening: 80% Racing-Mix, 10% Sunflower (striped), 10% Maize, add to the water Vitamultin B-Komplex 2-3 ml per l water	
	Friday: morning: 80% Racing-Mix, 10% Sunflower (striped), 10% Maize; clean water. evening: 70% Racing-Mix, 20% Maize, 10% Seeds. Especially before a long distance race the pigeons get Superkraft GeNies-Powder (3g/l).

Pico - Bird

Pico-bird-Vitamina-18

This multivitamin preparation contains **18 vital vitamins** in a golden yellow, clear solution. The versatile water-soluble vitamin concentrate makes it a logical choice for all stress periods, the moulting time and the exhibition season. Nerve function and blood circulation are enhanced, metabolism and resistance against diseases are strengthened. All types of vitamin deficiencies are prevented.

Art.-Nr. 8771 250 ml

Pico - bird - Protein 50

The building-up preparation „Pico - bird - Protein 50“ powder contains all important essential amino acids. It leads to an upgrading of the grain feed and to an improvement of fodder utilization due to the addition of metabolic, active substances, vitamins and trace elements. „Pico - bird - Protein 50“ powder supports the development and growth of young birds and should be given regularly to breeding and young birds. It can be administered via the feed and/or the drinking water.

Art.-Nr. 8709 400 g

Pico - bird - CPM-Mineral

minerals for feather, bones and nerves. Pico-bird-CPM ist a powder which contains the essential minerals Calcium, phosphorus and magnesium in an ideal combination. Because animals have permanent need of these elements to form and rebuild their bones or feathers Pico-bird-CPM is a need for our birds.

Art.-Nr. 8133 400 g 5,95 €

Pico-bird-moulting aid

This water-soluble preparation with essential amino acids is a help throughout the moulting period. It contains important substances required by birds to form feathers. The decisive advantage of Tricom moulting aid is its high content level of the sulphurous amino-acid methionine in combination with valuable mineral salts and a special multivitamin concentrate.

Art.-Nr. 8272 250 ml

Pico - Iodine-ferrum-Plus

Pico-bird-iodine-ferrum-plus is named for the additional nutrition with trace-elements, especially with iodine and iron.

They are essential for the metabolism, and necessary for enhancing the oxygen intake which is needed to strengthen the power output.

Iodine-ferrum-plus supplies the following important trace elements: Ferrum(Fe), iodine (J), manganese (Mn), zinc (Zn), copper (Cu) and cobaltous (Co).

Art.-Nr.: 8282 250 ml

Pico-bird-Vitaminkomplex -

multivitamin solution

is suitable not only for optimum breeding and growing, but also for constant moderate use throughout the year. **Pico-bird-Vitaminkomplex** is an all-round product and could be administered prior to exhibitions and during moulting for better results.

It contains the vitamins: A, B1, B2, B6, B12, D3, E, K3, nikotinamide and cholin.

Art.-Nr. 8897 250 ml

Pico Grit

Art.-Nr. 3268 750 g

Picosan - dry-bath - 500 g - 5 L

The care product Picosan is a must for every good poultry keeper! With Picosan nasty parasites in lofts and stables are belongings of the past. Picosan is not a poison, nevertheless it keeps pests away from animals by cleaning and drying the pests out.

Picosan dry bath keeps poultry clean.

Art.-Nr. 7950

500 g - 5 L

Picosan - Trockenbad

Das Produkt Picosan ist ein muss für jeden anspruchsvollen Geflügelhalter!

Mit Picosan gehören lästige Ektoparasiten in Stallungen und am Geflügel der Vergangenheit an!

Picosan Trockenbad hält das Geflügel sauber.

Inhalt 500 g

Gebrauchsanweisung:

Picosan befreit Tiere von lästigem Ungeziefer.

1. Den Boden reinigen, danach die trockene Einstreu mit Picosan bestreuen.
ca. 100 Gramm Picosan in ca. 5 bis 10 kg trockenes Erbsenstroh, Holzspäne oder andere Stalleinstreu einmischen.
2. Die Einstreu ist gesättigt, wenn Picosan nicht mehr in der Streu anhaftet. **Wichtig: Die Einstreu muß trocken sein.**
ca. 100 Gramm Picosan in ca. 10 kg trockenen Scharrsand bzw. Staubbad des Geflügels einmischen.
3. Das Staubbad soll dem Geflügel permanent zur Verfügung stehen. **Wichtig: Die Feuchtigkeit muss aus dem Stall.**
4. Nistschalen, Nistzellen, Ritzen in Fußböden und Wänden mit Picosan einpulvern.
5. Bei hartnäckigem Befall sollte das Tier 5 Tage direkt mit Picosan eingepudert werden.

Da Picosan den Gliedertieren die Feuchtigkeit entzieht und somit das Mikroklima für die Gliedertiere lebensfeindlich wird, sollte Picosan prophylaktisch immer als Trockenbad im Stall zum Einsatz kommen. 4038123079500
